Osprey Approach has the ability to display DX numbers if they are present rather than the address, as long as the DX number has been filled in.

Navigate to Supervisor > System Setup > Configuration Settings

Locate the switch Merge Contact DX

Right-click and select Edit

You will have the option to select True or False from a drop-down list.

 Save

 Cancel

Switch Name: Merge Contact DX

Switch Value: True

Select True and click Save. Now when running any document in Osprey Approach where the postal address is set it will merge through the DX number instead.
